

Rocketmedical

Customer Information Bulletin:

Copeland® Fetal Scalp Electrodes & Surgi-Hook™ Membrane Perforator.

Background:

Rocket Medical plc are pleased to announce their acquisition of Surgicraft Ltd's Obstetric business with effect from 10th November 2006.

The products, which include Copeland® Fetal Scalp Electrodes and the SURGI-HOOK™ Amniotic Membrane Perforator have been in successful use for over 20 years. The former is supplied to over 90% of UK Hospitals.

Rocket Medical have a long and enviable reputation for reliability and innovation in the Labour Ward and acquisition of this range strongly complements our existing fetal products such as KCH™ Catheters and Amnion™ Fetal Blood Sampling Kits.

Rocket Medical continue to be committed to this speciality, not only with investment through acquisition but through new product developments and introductions.

Action:

Surgicraft Ltd have transferred their customer records to us and we are now responsible for continuity of supply of your products. The terms of existing contracts and tenders will be honoured until their expiry.

We are working hard to make the transition from Surgicraft to Rocket Medical as seamless as possible and to assist this, the products will remain available through NHS Logistics using their existing order codes or directly from Rocket using the new order codes detailed below.

New Rocket® order code	Description	Original Surgicraft code	NHS Logistics order code
